The Adhesive Company

Bostik is a worldwide company with over 4,000 employees, 48 production facilities and sales operations in 45 countries across 5 continents.

Bostik's parent company is Total, a 246 billion dollar multi-national company.

A world leader

Construction & Industrial Business Unit

The Construction & Industrial Business Unit serves the following marketplaces: Flooring Installation Systems, Construction Sealants and Adhesives, Rigid Packaging, Insulated Glass and Industrial Distribution.

We are America's most experienced manufacturer of flooring installation products for tile, stone, hardwood, carpet and vinyl. Our expertise, customer service and technical support ensure prompt delivery of the right products for the job. Product categories within this area include: ceramic tile grouts, mortars, waterproofing/anti-fracture membranes and mastics, hardwood adhesives, moisture vapor membranes, underlayments, and patches, as well as adhesives for floor covering such as carpet, vinyl, resilient, rubber, VCT and laminate flooring.

We have engineered products for specific construction applications for both the commercial and residential markets. Our adhesives and sealants consist of unique, construction, architectural grade and hybrid formulas that offer strength, durability and long-lasting performance.

Bostik's Industrial adhesive market, which includes Window and Door, Rigid Packaging, Insulated Glass and MRO Products, focuses on a regionally appropriate core product line while offering superior technical service and support to bring Value Beyond the Product.

Nonwovens/Tape & Label Division

Bostik, Inc's Nonwoven and Tape & Label Division offers best-in-class formulation expertise to bring continual innovation to the Baby Care, Adult Care, Feminine Hygiene, Tape, and Label markets. As a global division, the Nonwovens area focuses on leveraging global experience and learnings to bring superior elastic attachment, construction, pad attachment, and wetness indicator technologies to both global and local Nonwoven clients. Serving North, Central, and South America, the Tape & Label Division continues to build on growth by innovation in key market segments. The Nonwoven/Tape & Label Division brings years of marketplace experience with expert sales and support staff providing Value Beyond the Product.

in adhesives

Transportation Global Division

Bostik has a long-standing partnership with the Automotive and Transportation sectors, offering a complete range of adhesives and sealants for all stages of vehicle production, component manufacture, assembly and aftercare. Bostik adhesive systems are engineered for strength, durability, and styling aesthetics – all critical requirements in contemporary vehicle design and assembly.

Our adhesives satisfy the demands of automotive manufacturers for elasticity, torsional stiffness, temperature and weather resistance, adhesion to dissimilar materials, and minimal surface preparation.

We provide a full range of products designed for the production of trucks, trailers, recreational vehicles, mobile homes, trains and tramways, coaches and buses.

Applications include side panel bonding, roof bow construction, windshield and side glass installation, luggage compartment and door assembly, as well as interior trim.

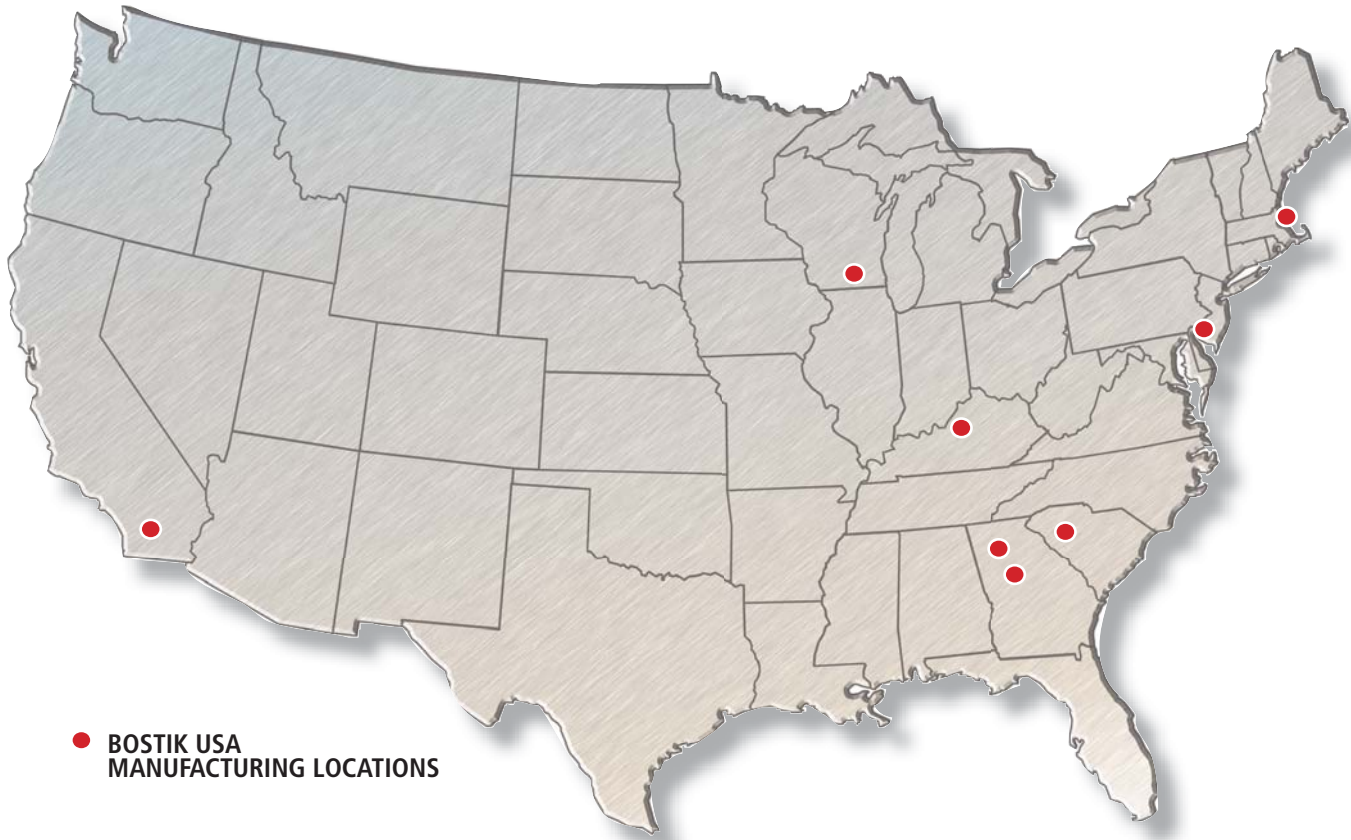

Flexible Laminating

The Flexible Lamination Global Business Unit combines the well-known and established technology of Herberts Adhesives in polyurethane and polyester systems with the highly recognized expertise in TURBO-SEAL and NIP-WELD cold seal adhesives and the exceptional value of Vitel copolyester resins. Bostik offers its know-how to the Flexible Lamination industry with the widest range of products.

For Flexible Packaging, we offer solventless 100% solids and solvent-based laminating adhesives for simple snack food packaging to high performance systems for retortable and chemical resistant applications. We offer heat seal coatings for PET film for ovenable and microwavable trays; we offer heat seal systems for lid stock for a variety of applications; and we offer cold seal adhesives for high speed packaging machines.

In industrial converting, our adhesives systems are used in demanding applications such as bonding film to fiber and film to cloth of sail cloth; bonding film to film for window film or photovoltaic films; or bonding film to foils in a variety of electronic applications.

Our philosophy is to establish a partnership with our customer's technical team.
